---

A fresher who is likely to join the best team to produce my best works with the team with good analytical and problem-solving knowledge .Having skills in Full-Stack development and Database operations .For details, [click here](#).

## WORK EXPERIENCE

---

### web developer

sept 2024 - Nov 2024

Web development intern at octanet services pvt ltd, learned some exceptional skills and completed various projects and experienced a great team work effort.

## PROJECTS

---

### Student Assistance Platform

Developed a web-based platform to assist students with dyslexia, featuring course tracking, grade monitoring, and personalized study plans.

Integrated Gemini API to generate dynamic study content, quizzes, and video recommendations based on student performance.

Implemented speech assistance for improved accessibility and user engagement.

Utilized Firebase for authentication and real-time data handling, with MongoDB for structured performance analytics.

### Showcase of Indian culture

Developed an interactive single-page web application that showcases the diverse culture, traditions, cuisine, festivals, and sports of all Indian states with a clean, responsive layout.

Integrated a dynamic slideshow on the homepage featuring famous landmarks and cultural images of India using JavaScript for enhanced visual appeal.

Implemented a clickable SVG map of India where users can select a state to explore detailed information with embedded images and videos on that state's cultural richness.

Ensured seamless navigation and user engagement using in-page dynamic content loading, reducing page reloads and improving performance.
